Yes, let me include Dan Cohen in this email chain. He is the best point of contact for this effort.

Dan, please see the below email chain and how we can work with the business community and how to prioritize these areas/businesses.

Chief,

Can we provide any insight into the areas that have the highest priority for coverage so that we could prioritize soliciting the businesses located there for potential support?

Andrew

Gents …

We had some initial discussions with hotels, in particular. I haven't had a chance to circle back with them to see what they decided in terms of placing cameras on their lots. Also think it might be interesting to approach some of the shopping center owners to see if they would have any interest.

If there are "priority" locations that we could work on first, that might make the most sense.

Subject: License Plate Reader Cameras

Hey Glenn,

Wanted to touch base with you on license plate reader cameras. The City is experiencing lot of success using this tool. I believe you're aware of this and perhaps there was some discussion about partnering with businesses on this. Chief Schneider knows where we're wanting to place the cameras strategically to gain the most benefit. Jason mentioned that there may be business interest in contributing to the cost of the cameras, as they will prove to help both deter and track down criminals that target their businesses.

What are your thoughts on this?

Thanks!

Andrew
